## DB/IQ Health Check

### How „healthy“ are your Applications?

Insufficient Personnel?

Individual Situation and Demand Analysis

“Health Check” to avoid Epidemics

Reduction of Maintenance and Development Costs

Cost Justification and Feasibility

**DB/IQ Health Check** offers you:

- ✓ Installation Support of our software
- ✓ Thorough check of your DB2 for z/OS applications
- ✓ Detailed reports with indication of potential performance risks

**Our goal is to analyse your DB2 for z/OS resources and to identify possible improvements**

#### Option 1 - Health Check

- ✓ Check all static & most important dynamic SQL in one of your DB2 for z/OS environments
- ✓ Check existing and new indexes, create impact analysis
- ✓ Test your LOADLIBs against the DB2 system catalogue for “consistency”, test of all Explain tables for “Mismatches”

Health Check implementation will last two days.  
Charges will be made to cover own costs only.

#### Option 2 - Hands-On-Trial

Your are interested in a trial, but you are lacking man power?!

We assist you in implementing a test installation and give you personally advice during the installation.

- ✓ **Benefits:** quick fault isolation by an experienced technician on-site and maximum rewards.

For the “Hands-On-Trial” implementation only travelling expenses will be charged.

We would gladly give you more details in a personal conversation and are looking forward to your inquiries.
